

Darryl Brooks Photography – Mount options

Box Frames

Your photograph print mounted in a deep wooden frame, in a selection of natural colours

Canvas

Photograph printed on canvas and wrapped on a 0.75" or 1.5" deep timber frame

Acrylics Desktop Blocks

Transparent acrylic blocks, with the image in the centre for free-standing use

Acrylics Style Range

A stunning range, produced using a premium quality 5mm frosted acrylic and hand finished, they are the ultimate way to present photographs. Your images sit behind 15mm crystal clear laser cut blocks, that add a third dimension to any photograph and give the most enviable look.

Acrylic Slot Range

Crystal clear acrylic slots on a 3mm premium quality acrylic backboard, providing a versatile mount which can be updated with newer photographs in the future. Available in a number of backboard colours (gloss black shown).

Acrylics - Bonded

Images are printed onto 320gsm high quality photo paper then pressure bonded onto the back of a high gloss acrylic panel.

They are supplied with 25mm deep brushed aluminum standoff fixings.

Acrylics - Sandwich

Wall Mounted Acrylic Sandwiches offer a smart, contemporary, acrylic framing solution which is more affordable than the bonded version. Your photograph is placed into the frame, between a sheet of 5mm clear acrylic and a sheet of 5mm acrylic (either, black, white or frosted). The frame is then mounted to the wall using attractive brushed chrome spacers.

Aluminium Bonded Panel

your photo is printed directly on to brushed aluminium producing a totally unique and never-before-seen art piece for your home or office. The printed metal sheet is mitre grooved and fabricated to create the finished product, which is secured neatly to the wall with concealed keyhole fixings. It looks like a solid chunk of metal suspended on your wall.

Finishes are available in Gloss White or Brushed Aluminium. Gloss White is perfect for any image while Brushed

Aluminium is great for those wanting an experimental edge to their photography. Images are printed directly to the dazzling metallic surface for the ultimate unique finish.
